TECHNICAL SKILLS

LANGUAGES

JavaScript (ES6+) | TypeScript | Python | Java | C++ | HTML5 | CSS3

FRONTEND

React | Next.js | Tailwind CSS | Bootstrap | Framer Motion | Responsive Design

BACKEND & APIS

Node.js | Express.js | REST API Design | MVC | Service-Layer Architecture | Authentication

DATABASES & ORM

PostgreSQL | MySQL | Prisma ORM | Schema Normalization | Complex Queries | Indexing | Connection Pooling | Redis

TOOLS & PLATFORMS

Git | GitHub | GitLab | Docker | Postman | Vercel | VS Code | IntelliJ IDEA

ENGINEERING PRACTICES

SOLID | DRY | KISS | GoF Patterns | Clean Architecture | Technical Docs

MACHINE LEARNING

K-Means | KNN | Decision Trees (academic)

Daniel Ayen

Full-Stack Software Engineer

Scalable Web Applications | Clean Architecture | Backend Systems & Database Design

PROFESSIONAL SUMMARY

Full-Stack Software Engineer and final-year Software Engineering student who designs, builds and deploys production-style web applications end to end. Strong in the JavaScript/TypeScript ecosystem (React, Next.js, Node.js, Express) with solid relational database design in PostgreSQL and MySQL. Committed to clean, modular, testable code: SOLID, DRY, KISS and Gang of Four patterns, with clear separation between routes, controllers and services. Experienced in remote team workflows, REST API design, caching and performance tuning.

PROFESSIONAL EXPERIENCE

Software Engineering Intern - CodeAlpha (Remote)

Jul 2026 - Aug 2026

React | Node.js | REST APIs | Git / GitHub

- Designed and developed full-stack web applications following modern architecture principles.
- Built RESTful APIs and connected React front-end interfaces to Node.js back-end services.
- Managed version-control workflows with Git/GitHub and wrote clear documentation for project repositories.

KEY PROJECTS

Enterprise Hospital Management System (HMS)

Lead Architect

Node.js | Express | Service-Layer Pattern | PostgreSQL

- Designed a multi-module system covering clinical workflows, inventory management and administrative tracking.
- Architected modular, service-layer backend components for complex hospital roles, enforcing data isolation and tight security constraints.

Student Department Allocation System

Full-Stack Developer

Next.js | TypeScript | Tailwind CSS | Prisma ORM | PostgreSQL

- Built an end-to-end system that automates freshman department selection and sectioning based on GPA, student preferences and department capacity.
- Engineered the backend allocation logic and designed a normalized relational schema that prevents race conditions during selection.
- Optimized data queries for efficient processing of student records.

Garage Management System (AbeGarage)

Lead Full-Stack Developer

React | Bootstrap | Node.js | Express | MySQL

- Built a management portal for employee and customer tracking, vehicle service requests and logs, inventory and automated invoicing.
- Implemented secure authentication and well-structured API endpoints for seamless front-to-back integration.
- Diagnosed and refactored critical database connection errors by moving the backend to a stable connection-pooling mechanism.

DANIEL AYEN

Full-Stack Software Engineer

EDUCATION

Bachelor of Science in Software Engineering

Injibara University, Ethiopia

4th-year student

Expected graduation: 2027

CERTIFICATIONS & LEARNING

- Introduction to Artificial Intelligence - Coursera
- Full-Stack Web Development & System Architecture - self-directed learning and academic projects

Transport Management Platform (TMS)

Dispatch & Tracking

Node.js | Express | React | PostgreSQL | Tailwind CSS | Redis

- Developed a tracking and dispatch system for transport operations, vehicle assignments and schedule management.
- Introduced Redis caching for frequently queried data to improve page load times.

Jabi Tehnan Cooperative Union Web Platform

Live Client Website

Next.js | React | Tailwind CSS

- Designed and deployed a responsive web portal that strengthens the union's online presence, showcases its services and improves community communication.

Personal Portfolio & Interactive Case Studies

Personal Project

React | Framer Motion | Tailwind CSS

- Created a polished, responsive multi-page portfolio with Framer Motion micro-interactions and animations to present project case studies.
